The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Manalis (USPN 7,387,889).

Manalis discloses an analytical cell 100 in a U-shaped configuration, free-standing microfluidic channel 110 defined as a hollow within an elongated, finger-like cantilever 115 that projects from (and is integral with or joined to) a mechanically stable supporting substrate 120. Fluid flowing through a channel within the substrate enters the cantilever 115 and traverses the channel 110 as indicated by the arrows (fig. 1). In one configuration, calorimetric measurements are accomplished by detecting the bending of a thermal bimorph. As shown in FIG. 2, the bimorph comprises the cantilever 115 containing a microfluidic channel 110 and a material (e.g., a metal, such as gold or aluminum) 210 that is deposited on the exterior surface of the cantilever 115. The material 210 has a coefficient of thermal expansion different from that of the

cantilever 115. As a result, a temperature change leads to unequal thermal expansion, which causes the structure (i.e., the metal-treated cantilever 115) to bend. This temperature change arises from reaction between different species within the channel 110. The different species may be free, reacting as the sample passes from a source channel 215 into and through the channel 110. Alternatively, however, one (or more) of the species may be bound within channel 110. In one embodiment, the bound species is attached to surfaces (e.g., interior walls and/or structures within the channel, as described below). In another embodiment, the bound species is suspended within a gel that fills channel 110. In each case, a potential difference may be established through the channel, and species of interest caused to circulate through the channel electrophoretically.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SAM P. SIEFKE whose telephone number is (571)272-1262. The examiner can normally be reached on M-F 9:00am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on 571-272-1700. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
